Sr. No.	Product Name	Applications
1		<ul style="list-style-type: none">• Disinfectant with high concentration which kills major Microorganisms and keeps surface bacterial free for longer time.• It's Chemical, Stabiliser free and made from highly saturated stable Oxygen dissolved in water.• Leaves no residue and safe to humans and environment.• It is best and compared to Quaternary ammonium compound (QAC).
2		<ul style="list-style-type: none">• Product is developed keeping in mind many Agriculture crops, Fruits and other uses• It reduces Fungal, bacterial load from crops enhance productivity and give longer shelf life.• Also reduces pesticidal load.• The product is very useful and effective for various flowers and its variants.• Considering delicacy and freshness and colour. Spraying of the solution enhances its natural colour and freshness for a longer time.

3		<ul style="list-style-type: none"> • It's one of the active formulation can be explored for Mangoes. Its diluted form can be used for Spraying, Deepening, and fungus like Anthracnose and stem end rot.
4		<ul style="list-style-type: none"> • Universal requirement of Humans is good quality of water. Many naturally and artificial contents were added to get pure water. • We have come up with a unique solution of dissolved stable oxygen in water which will detoxify the water. • Also kills microorganisms and keeps water fresh and healthy as oxygen is necessary to keep Humans fresh n active. So considering this the unique product "Oxygenated Water" can be introduced.
5		<ul style="list-style-type: none"> • In Dairy industries one of the basic problems is that Milk contamination. • Main reason is the storage and transport of the milk. • The product can be very well used for Cleaning in place (CIP) application where it reduces Microbial load of the Pipelines, storage and transport vehicles. Keeps milk fresh and intact for a longer time.

6		<ul style="list-style-type: none"> • Now a day's Aqua culture industry is booming as Fresh vegetables can be produced in smaller area using water and nutrients. • The main crucks of this is the Lack of Oxygen in water as water is continuously flowing in the system. • Our product has lot of Dissolved Oxygen which helps roots to absorb Oxygen and helps in growth. Also it helps nutrients to absorb completely as Oxygen content is high. Do not allow microbial growth in water.
7		<ul style="list-style-type: none"> • Marine produces largest no off variety of fish. Considering its variety main product Surmi and its varieties were developed. • Main concern for this processing is huge load of Microorganisms in fish meat and water used for recycling. • Can be used to treat Fresh fish, Shrimps and other related products which keeps fish fresh and can be used for longer time. • We have developed the niche product knowing this fact. The product is used to kill microorganisms and enhances its shelf life. Also keeps its other properties intact.

8		<ul style="list-style-type: none"> • Niche product developed for Pharmaceutical applications where Hard Microorganisms are difficult to remove. • Water based applications so can be explored to many applications like Surface cleaner in sterile area. No product contamination observed as no residue left behind. Even reduces traces of excess Chlorine. Very effective and powerful solutions for Pharma Industry.
9		<ul style="list-style-type: none"> • This key product can be used for washing of Vegetables and fruits in much diluted form. It does not content any harmful chemicals, chlorine, sulphates and stabiliser. • Improve shelf life of vegetables and keep the Green n fresh. • Removes pesticidal load of the fruits and keeps them fresh. The same product can be explored for meat & related products like Chicken, Mutton, Fish, Shrimp etc. It helps to reduce microbial load and keeps meat products fresh, removes foul smell and enhanced shelf life.
