OZOSAN™ AGRO (MANGO)

Further on more development we came across Niche Fruit of Mango and we have developed single solution which can be used for many ways especially keeping “Alphonso Mango” Fresh and Durable for longer time. Our product also removes microorganisms, fungal infections and keeps Fruits best in Quality for a longer time.

Following applications can be explored :

- 1) Mango washing on trees.
- 2) Deepening of Mangoes after getting down from trees.
- 3) Spraying on Mango tree which can avoid fungal infections.
- 4) Controlling Anthracnose & Stem end rot.
- 5) Drip irrigation to improve soil Oxygen content and roots enhancement.
- 6) Overall enhances Mango Shelf life.

We have also define some processes after experimental trials :

- 1) The 1 Liter Oxygenated solution can be diluted to 20 liters.
- 2) For One tree spraying 20 liter can be utilized.

- 3) For Deepening of Mangoes in 20 liter solutions around 1 Dozen of Mangoes can be deepened for 15 minutes. This can be done for 3 cycles. Means precisely 3 dozen of Mangoes can be treated in one liter solution.
- 4) For Anthracnose & Stem end rot, we recommend to spray entire tree and specifically Mangoes before getting down the fruit.
- 5) Spraying is recommended from start of the cycle every after 10 to 15 days for better quality of the fruits.
- 6) Drip irrigation also for a growing tree is recommended from start.
- 7) The water used after 3 cycles of deepening can be further used for planting of the Mango trees or any other trees to utilize its Notional value and soil and roots enhancement.

Ozosan Agro (Mango) Comes in 5 Liter, 20 Liter and 35 Liter bulk packs.

OZOSAN™ The Stable Oxygen Based Water Based Solution

Envirosafe Techsolutions LLP have come up with a novel solution in the field of Water, which is the most essential requirement of everybody on the Earth. Our team of Scientists has developed innovative Product named “ **OZOSAN™** ” The Stable Oxygen Based Water Based Solution

These are few features & applications of Ozosan:

- **Ozosan** is not a Chemical compound like other stabilisers which are currently used.
- **Ozosan** can be used for decontamination with Oxygen concentration stabilized by process in Distilled water.
- It has no Stabilizer leaves no toxic colour or chemical residue.
- **Ozosan** has highest oxygen content (**Upto 50 %**) ever achieved.
- Odour & Taste - Odourless & Tasteless at recommended dosages.
- Kills Bacteria, Fungi and spores.
- Develops no antimicrobial resistance (AMR) like many antibiotics and chemicals.
- This product can be explored in many applications like Agriculture, Water, Foods, and Pharma & FMCG.
